

# **BONDING TIME**

**Thank you for stopping by but we ask that our new families have the opportunity to bond and rest every day from**

***1:00 PM to 3:00 PM.***

**We ask that all visitors return after 3:00PM. Thank you for assisting us with this gift to our new families.**

***GPRMC Women's Center Staff***

- The patients to be informed of the “bonding time” before it arrives; let them know you will not be allowing visitors so ask if there is someone they are waiting on or would they rather not participate.
- Dim the lights on the floor.
- Round on the patients at/before 1300 and let them know you will leave them undisturbed until 1500 but call for assistance if needed. Pass any medications that may be due during this time by 1300 if clinically able.
- Keep a low ambient noise level in the hall and at the nurse’s station.
- Remind physicians that we have started our “bonding time” so they can avoid doing rounds/procedures during this time, L&D is the exception of course.
- Please remind other team members to remain quiet while on the hall as well.
