

IEPA Faculty Development Committee

Who We Are

An open-invitation group of faculty and staff from across campus committed to the engagement and promotion of campus-wide interdisciplinary/interprofessional programming.

Goals

Develop a formal faculty development program to ensure all faculty have education and training available in the four domains of the IPEC Competencies.

Deliverables

Engagement of the campus community in such a way as to support delivery of IPE curricular activities.

Projects

Training & Education

The team is developing a systematic facilitator training program in support of our curricular programming. Facilitator training will be applicable to activities such as:

- All Professions Day
- IPE Clinic Experience
- Additional curricular initiatives

We also deliver routine Education Sessions of interest to the campus-wide interprofessional community. This year's series was on the topic of Unconscious Bias with a presentation given by Dr. David L. Gordon.

Membership Engagement

The success of our campus-wide interdisciplinary/interprofessional activity is dependent upon the engagement of faculty from all programs. Our team actively seeks to invite and include new faculty to assist with our campus-wide programming.

Grants

The Wisdom Family Foundation Interprofessional Education Research Seed Grants offers an additional opportunity to engage campus faculty, staff, and students in the development of campus-wide programming. Our team coordinates the processing of this grant.

Awards & Recognition

In recognition of the hard work and long hours of our interprofessional teams, our committee is developing the following awards that will be given in the 2019-2020 academic year.

- IEPA Faculty Leader of the Year Award
- IEPA Team Award
