

Interprofessional Clinical Experience Orientation

Setting Clinic Strategy

Task #2

Plan how your team will structure your patient encounter.

1. How will your team gather information from the patient?
2. How will you prioritize what your team addresses with the patient at each visit?
3. How will your team share patient information with all team members?
4. How will the team present the information to the faculty member attending in the clinic?
5. What time management strategies might be helpful?
