

Interprofessional Clinical Experience

PATIENT PRESENTATION GUIDELINES

- Your team must present your patient to your faculty group prior to sending the patient out of the clinic.
- This will allow your faculty group to collaborate with you on your plan of care for the patient.
- Your team will decide how you want to structure your presentation (*ex. Who presents, In what order information is presented,*), making sure to include the following information:

Pt Presenting Complaint

Overview of Pt History (this will be a new patient for your group and your attending faculty panel)

Pertinent Physical Exam

Pt Problem List (list of diagnoses and health issues to be addressed in the process of care for this patient – this list will likely grow as the Pt is seen on follow-up visits)

Plan of Care for this visit

Long-term Healthcare Goals for your Pt – beyond the medical care
